

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application. Please cancel claim 30 without prejudice or disclaimer and amend claim 29 so that the current status of all claims is as follows:

Listing of Claims:

1. (previously presented) A method for remotely ordering image products or services by a customer with respect to digitally stored images, comprising the steps of:
 - storing a digital file of at least one image in a memory device by a third party service provider on behalf of said customer;
 - facilitating remote electronically ordering an image product or service by said customer from said service provider with respect to said at least one image from said stored digital file over a communication network; and
 - facilitating the designation of a party by said customer to which said image product or service is to be provided.
2. (original) A method according to claim 1 wherein said electronic ordering is accomplished by entering said order using a device capable of providing electronic communication over said communication network.
3. (original) A method according to claim 2 wherein said device is a touch pad.
4. (original) A method according to claim 3 wherein said device is a phone.
5. (original) A method according to claim 4 wherein a touch pad is used on said phone.
6. (original) A method according to claim 1 wherein said image product comprises a photographic print.
7. (original) A method according to claim 1 wherein said obtaining said digital file comprises scanning a photographic media.

8. (original) A method according to claim 1 wherein said electronic ordering comprises ordering by voice.

9. (original) A method according to claim 1 wherein said digital file is obtained by scanning a photographic film.

10 (original) A method according to claim 1 wherein said image comprises a plurality of images.

11. (original) A method according to claim 10 wherein said plurality of images and said order number are printed on an index print.

12. (original) A method according to claim 1 further including the step of verifying the address and credit card number of the customer ordering said image product or service.

13. (original) A method according to claim 7 wherein the images are scanned in a first location and transferred to a second location for storage.

14-28. (cancelled)

29. (previously presented) An image management system for remotely ordering image products or services by a plurality of customers with respect to digitally stored images, comprising a computer having a mass storage device for storing digital images the mass storage device storing at least one digital file of at least one image for a plurality of customers, each of said digital files having an associated number for identifying said digital file of each of said customers, said number being used for identifying said images and for ordering of products or services with respect to images stored in said mass storage device, said computer facilitating remote electronic ordering of an image product or a service by each of said customers with respect to said at least one image over a communication network using said associated number, wherein said image product or service is provided to a party designated by one of said customers.

30. (cancelled)

31. (previously presented) An image management system according to claim 29 wherein said electronic ordering is accomplished by entering said order using a device capable of providing electronic communication over said communication network.

32. (previously presented) An image management system according to claim 31 wherein said device is a touch pad.

33. (original) An image management system according to claim 32 wherein said device is a phone.

34. (previously presented) An image management system according to claim 33 wherein a touch pad is used on said phone.

35. (previously presented) An image management system according to claim 29 wherein said image product comprises a photographic print.

36. (previously presented) An image management system according to claim 29 wherein said obtaining said digital file comprises scanning a photographic media.

37. (previously presented) An image management system according to claim 29 wherein said electronic ordering comprises ordering by voice.

38. (previously presented) An image management system according to claim 29 wherein said digital file is obtained by scanning photographic film.

39. (previously presented) An image management system according to claim 29 wherein said image comprises a plurality of images.

40. (previously presented) An image management system according to claim 39 wherein said plurality of images and an order number are printed on an index print.

41. (previously presented) An image management system according to claim 40 wherein said order number identifies the digital file of said index print.

42. (previously presented) An image management system according to claim 29 further including the step of verifying the address and credit card number of the customer ordering said image product or service.

43. (previously presented) An image management system according to claim 38 wherein the image is scanned in a first location and transferred to a second location for storage.
